WRITERS RESIST events are organizing internationally on Martin Luther King Jr's birthday. "WRITERS RESIST, invented by poet & VIDA co-founder Erin Belieu, and co-sponsored by PEN America is not affiliated with a political party. We wish to bypass direct political discourse in favor of an inspired focus on the future, and how we, as writers, can be a unifying force for the protection of Democracy. In order for us to heal and move forward, individually and as a nation, we believe people need something to be *for* in this anxious moment. The only thing we 'resist' is that which attacks or seeks to undermine those most basic principles of freedom and justice for all."
