In this award-winning and often flat-out-funny documentary, we follow 'everyman' Jeb Berrier as he embarks on a global tour to unravel the complexities of our plastic world. What starts as a film about plastic bags evolves into a deep investigation into plastic and its effect on our environment, marine life, and human health.

Following the film there will be a Q&A session and discussion of our efforts to reduce plastic pollution in Ellsworth and how you can help!
